PREFACE

This Catalogue represents an effort, more or less crude, to place before the members of the Association a classified list of the books and pamphlets, journals and magazines, that have been gathered into our library since its opening ten years ago. It is not the work of a professional cataloguer, but of a business man, who has been able to give to it only his leisure time and such odd moments as he could spare in the intervals of daily duty. Its publication was planned for the early summer of this year; but just as the first pages went to press the compiler was called upon to remove to New York, and as a result all subsequent work had to be done at long range and by correspondence. Produced under such conditions the book cannot fail of many imperfections; nevertheless, its compiler trusts that it may be of some assistance to those seeking information at our rooms. If it shall save any of his fellows labor, or open up to them new avenues of instruction and entertainment, he will feel amply rewarded for the time and work devoted to its production.

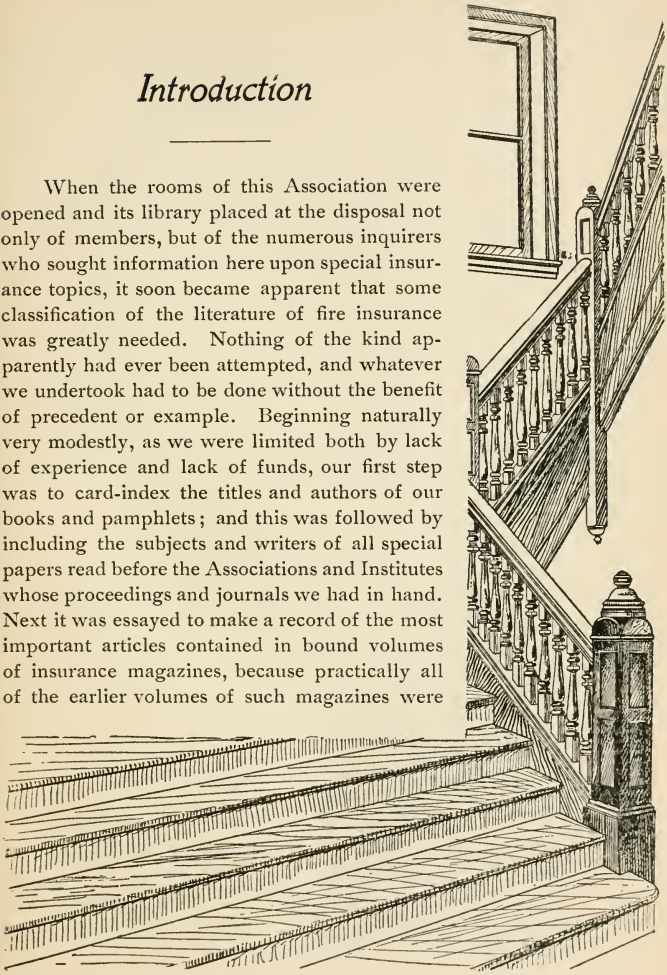
Introduction

When the rooms of this Association were opened and its library placed at the disposal not only of members, but of the numerous inquirers who sought information here upon special insurance topics, it soon became apparent that some classification of the literature of fire insurance was greatly needed. Nothing of the kind apparently had ever been attempted, and whatever we undertook had to be done without the benefit of precedent or example. Beginning naturally very modestly, as we were limited both by lack of experience and lack of funds, our first step was to card-index the titles and authors of our books and pamphlets; and this was followed by including the subjects and writers of all special papers read before the Associations and Institutes whose proceedings and journals we had in hand. Next it was essayed to make a record of the most important articles contained in bound volumes of insurance magazines, because practically all of the earlier volumes of such magazines were



published without indexes; but this undertaking called for so much time to be devoted to looking through the volumes that it has not progressed beyond a beginning.

Scrapbooks were also arranged, into which were gathered articles of interest appearing in daily newspapers and publications not exclusively devoted to insurance. All this was done by workers untrained in library work and hampered by lack of means; but finally enough material was secured to justify an effort at classification, and the results of that effort are presented in this volume. Nothing is listed therein but what is actually in our files, and nothing is duplicated, an entry being made but once and then credited either to the author of a book, the writer of a paper, or, failing accredited authorship, to the periodical in which it is to be found. An index, however, is added where all the entries credited to any given author are grouped by number under his name.

As to the classification itself it might be much improved; but as it is the first of its kind it is put forward with the hope that it will be found at least better than none at all. It is arranged alphabetically, and under headings that, so far as possible, have been made self-suggestive.

While the main effort of the Association has been to establish a library of fire and marine insurance literature, it has incidentally come into possession of many books relating to other branches of insurance, and all of these are entered under the one classification of "Life Insurance"; not because they belong there, but because it was not deemed worth while at this time to make special classifications for branches other than those most prominently represented in our collection.

In nothing has greater difficulty been encountered than in the effort to gather together complete sets of Proceedings and Transactions of field organizations and foreign institutes. Although containing most valuable contributions from practical men, these yearly publications have hitherto been allowed to quickly drop from sight, and the search required to bring together complete files of them has been successful only because persistent and insistent.

Equally difficult has been the work of building up complete files of Insurance Journals, only one publisher being able to furnish his paper complete from its beginning, and in a majority of cases it being impossible to secure from the others even correct sketches of the history of their papers. The correspondence entailed by our efforts to secure missing volumes has been voluminous to an extent justified only by the results herein recorded, which we feel are the more surprising when their moderate money cost is considered. This we owe chiefly to the generosity of the publishers, who have not only furnished us with current issues from year to year, but have given us every assistance in advertising for volumes needed. Their generosity has been ably seconded in many instances by that of companies who allowed us to go through their accumulations of periodicals and take therefrom any publication wanted for our own files.

In connection with our search for missing volumes a singular fact may be noted for the benefit of other searchers, and that is that in many instances volumes are included by journals in their enumerations which, as a fact, were never issued. Commonly this grows out of a change of name, the new journal continuing the volume enumeration of the old one; but almost as often it is the result of changes from semi-annual to annual publication; under any circumstances it is confusing and discouraging to those who spend time seeking for volumes that were never published. So far as we have learned of these and other changes in enumeration or make-up or title of journals, we have noted the same in our sketch of each in this volume, in the hope that the information may be of service not only to our own members but to students of insurance literature in other parts of the world.

It is our impression that the titles of the papers read before the Associations of this country and the Institutes of Great Britain have never before been brought together and classified, and in this it is possible that our work may be of value to the members of those organizations wherever located. If so, we shall regard it as some requital for their kindness,

and more particularly that of their Secretaries, in helping us to make our sets complete.

The volumes referred to as "Mutual Publications" are compiled by us, and contain the circulars issued to members of the Boston Manufacturers Mutual Insurance Company, furnished us through the courtesy of that Company.

In gathering together a record of articles and books referring to Buildings and Building Laws, as well as in listing the addresses made before Associations of Firemen, it is believed that material is secured that cannot fail to be of use in the business of fire insurance. Electrical hazards are also of such importance in that business that a special classification of books and pamphlets relating thereto has been made; and publications relating to Acetyline and its hazards are listed in connection with those on inflammable oils.

Some of the most thoughtful and pertinent suggestions in our business have been made by presiding officers of Field Associations in their annual addresses, and in order to afford some means of referring to these a separate classification of such addresses is made, showing when and by whom they were delivered.

No effort has been made to collect Rate Books and Tariffs, but a few have been preserved as of interest in connection with the fire insurance history of Boston, or as illustrating customs of the business in other parts of the world.

In prosecuting our work we have had occasion to invoke the assistance of many correspondents, at home and abroad, whose generous help it would be a pleasure to acknowledge here by name were the list not too long for the limits of our volume. We must therefore content ourselves with putting on record our appreciation of the services rendered us, and our feeling that without such assistance this catalogue, lacking material, could not have been compiled.

2014. **New York State.** Abstracts. In 1828 a Statute was passed requiring all "monied corporations" thereafter created to file annual statements with the Comptroller of State. Companies from other States and from other countries were not before 1849 required to make any annual or other statements, except of premiums received; and it was not until 1864 that *all* insurance companies—Fire, Marine and Life—were required by law to make and file annual statements of their condition and affairs. Neither were the annual reports of New York State companies required to be published in any manner; they were simply to be entered in a book which was required to be open to public inspection. In 1873, however, William

Barnes published abstracts of all the reports that could be found on file from 1831 to 1859, inclusive, which publication we have complete in two Volumes O., *I. pp.* 1042; *II. pp.* 1204.

2015. ——. Comptroller's Reports, covering Reports of Insurance Companies for 1855 to 1859, inclusive, in five Volumes O. Also Special Report to the Comptroller of three Insurance Commissioners appointed to examine into the condition and affairs of the Fire Insurance Companies in New York and Brooklyn in 1856. One Volume O.

2016. ——. Insurance Department established 1860. Annual Reports, covering Fire and Marine Companies, complete from 1860 to 1898, inclusive, in forty-two Volumes O. The Commissioners, with terms of service, have been:—

William Barnes	1860–1870
George W. Miller	1870–1872
George B. Church	1872–1872
Orlow W. Chapman	1872–1876
William Smyth	1876–1877
John F. Smyth	1877–1880

This Association continued until May, 1887, when it was decided that its name was misleading, and that it would be better to have a title which could be readily understood by those who read or heard it, and the name of Boston Board of Fire Underwriters was adopted. The work of the Board is to make rates on all Boston risks, to make rules governing the writing thereof, and the payment of commissions thereon, to supervise the introduction of electric installations, and to inspect all manufacturing and business buildings as well as automatic sprinkler and automatic alarm installations.) to consist in obtaining information for the general benefit of underwriters, which work it still carries out.) Constitution, Tariff of Rates and General Regulations. *Boston*, 1875, *S.*, *pp.* 76.

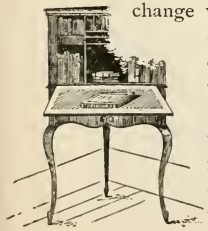
APPENDIX

Containing a Sketch of the History of the Association, with a List of its Members and Other Information

---

The Insurance Library Association is so directly an outgrowth of the New England Insurance Exchange that a sketch of its history must begin with that of the mother organization. The Exchange was formed in 1883 by the fire insurance field men having jurisdiction in New England. It was a purely voluntary organization, exposed to the possibility of disruption at any time, and in that case whatever property it might have acquired would have been left without ownership. As the value of this property increased from year to year, the necessity of providing some permanent form of ownership for it became more and more apparent, and this culminated when it was proposed on behalf of Exchange members to establish a library of fire insurance literature in a decision to provide some form of corporate ownership. To incorporate the Exchange was out of the question, and finally it was decided to form an incorporated society composed of members of the Exchange, which would thereby be controlled entirely in its interest, but which at the same time would be assured of continued and permanent existence in case the Exchange went out of operation. Accordingly, on the twenty-eighth day of December, 1887, a



certificate of incorporation was granted by the Commonwealth of Massachusetts creating the Insurance Library Association of Boston, "for the purpose of prosecuting educational, historical, literary, scientific, and social purposes primarily in connection with, or relating to, insurance; acquiring and holding books, maps, plans, surveys, and papers relating to insurance, and general literature and science, and for establishing, fitting, furnishing, and maintaining a suitable place for a reading room, library, and for social meetings; and for any and all other purposes legitimately incidental to, or in aid of, the main purposes of the Association."

The Insurance Library Association being thus created, it became necessary to provide funds to carry out its objects, and the fire insurance companies represented in the Exchange were appealed to, and responded with subscriptions amounting to over five thousand dollars. With this for an equipment fund, the Trustees proceeded to secure and fit up rooms, which were opened on the twenty-second day of December, 1888, almost exactly a year after the Association was incorporated. From the outset it has been the plan of the Trustees to provide and maintain the property of the Association at a high standard of quality and efficiency, and as a result the income derived yearly from membership fees has been largely spent in adding to the library and in necessary enlargements and repairs; nevertheless the funds have been so well husbanded that the amount originally spent in establishing the plant has been replaced in bank, so that that which was at the outset subscribed as an Equipment Fund has now become a Maintenance Fund, yielding an interest income, which is added to the principal from year to year. One generous legacy has been left the Association by a deceased member, and in time similar bequests may be looked for from those who to-day are enjoying the privileges of membership. No more appropriate manner of keeping their memory green could be suggested, for the work of the Association is being constantly enlarged, and its scope is limited only by the means at the disposal of its Trustees.

By-laws of the Association

ARTICLE I.

Admission to membership in The Insurance Library Association of Boston shall be open only to members of the New England Insurance Exchange, and to New England field men of Companies subscribing to the equipment and maintenance of this Association. Any such member, or any such field man, who shall sign these By-laws and pay the sum of ten dollars as the first year's due, shall thereby become a member of this Association, and shall thereafter pay an annual assessment of ten dollars, together with such further assessments as shall be recommended by the Board of Trustees and approved by vote of the Association.

Membership.

Annual Dues and Assessments.

Any member of this Association shall, if elected by a majority vote of the members present at any regular or special meeting of this Association, become a life member thereof. In issuing a call for such meeting the clerk shall state in said call the name or names proposed for life membership. Life members of this Association shall have all the rights and privileges accorded to active members.

Life Members.

Members shall have the same rights and privileges, and be subject to the same responsibilities, as if they had signed the original agreement for incorporation of this Association. If a member changes his occupation so as not to be connected with the insurance business his active membership shall cease; but he shall be given a subscriber's card, without charge, for the remainder of the year for which his dues

Rights and Responsibilities.

Active Membership shall Cease.

are paid, upon application to the Trustees. Only active members shall have the right to attend and vote at the meetings of the Association. If any member shall fail to pay any assessment within the time in which it is, by vote of the Association, made payable, his membership shall thenceforth cease, and shall not be renewed save by vote of the Association and upon payment of all unpaid dues.

Right to Vote.

Failure to Pay.

ARTICLE II.

Subscribers' cards and Visitors' cards, entitling their holders to the use of the reading room and library at such times and under such rules and charges as may be fixed and established therefor, may be issued under direction, and with approval, of the Trustees.

Subscribers' and Visitors' Cards.

ARTICLE III.

An annual meeting of the members of the Insurance Library Association of Boston shall be held on the second Saturday in January of each year, at the rooms of the Association, or at such other place as may be designated in the notice for the meeting. Notice of the annual meeting and of any special meeting shall be signed by the President or by the Clerk of the Association, and shall be given either by delivery in hand to each member, or mailed to the last-known post-office address of each member to whom notice in hand is not given, not less than seven days before the time for such meeting. Notice, as above provided, of any meeting may be dispensed with in the case of any member or members who shall in writing acknowledge receipt of due and sufficient notice of such meeting. Special meetings of the Association shall be called by the President, with notice as above provided, upon the written request of not less than five members of the Association. At any meeting of the Association at least fifteen members shall be necessary to constitute a quorum; but in the absence of a quorum, a less number may adjourn the meeting to a specified time and place.

Special Meetings.

Quorum.

ARTICLE IV.

Parliamentary Rules.

The usual parliamentary rules shall govern the transaction of business on all points not otherwise provided for in these By-laws, and the order of business, unless otherwise directed at any meeting, shall be as follows:—

Order of Business.

1. Calling the roll.
2. Reading the record of previous meeting.
3. Reports of committees.
4. Unfinished business.
5. New business.
6. Election of officers when occasion requires.
7. Adjournment.

ARTICLE V.

Officers.

The officers of the Association shall be a President, chosen from the Trustees as hereinafter provided, seven Trustees, to act in the place and with the power of Directors, as hereinafter provided, a Treasurer, and a Clerk.

When Chosen and How.

The Trustees, Treasurer and Clerk shall be chosen by ballot at the first meeting of the Association, and thereafter at the annual meetings of the Association, and shall hold office until the next annual meeting, and until others are chosen and qualified in their stead.

Term of Office.

In case of a vacancy in any of these offices, the same may be filled by the election of a successor at a special meeting of the Association, duly called for that purpose; and the successor so chosen shall hold office for the remainder of the current year and until the election and qualification of his successor.

Vacancy.

ARTICLE VI.

Board of Trustees.

The government of this Association shall be in the hands of a Board of Trustees, of whom there shall be seven, elected at each annual meeting for one year by ballot from among the active members. The Trustees shall, at their first meeting after the organization of this

Corporation, and at their first meeting after each annual meeting of the Corporation, or after a vacancy occurs in the office of President, choose by ballot one of their number to be President of the Corporation, who shall also act as Chairman of the Board of Trustees. The Trustees shall have power to procure a proper building or rooms for the use of the Association, to subscribe for and purchase periodicals and books for the library, to hire a competent librarian, and otherwise to do and perform all things necessary to the proper welfare of this Association; but they shall incur no expense that there is not money in the treasury to meet, nor shall they make this Association liable to, or for, any debt exceeding one hundred dollars, unless authorized thereto by vote of the Association.

Shall Choose a President.

Powers of Trustees.

ARTICLE VII.

The President shall preside at all meetings of the Association and of the Trustees, when present; and in his absence a President *pro tempore* may be chosen. He shall perform all the duties incident to his office prescribed by law, by these By-laws and by vote of the Trustees. He shall have full power to call meetings of the Board of Trustees whenever he shall deem it expedient so to do, and shall call such meetings upon the written request of two or more of the Trustees. He shall also call meetings of the members of the Association whenever requested so to do by vote of the Trustees or upon the written request of not less than five members of the Association.

Duties of President.

ARTICLE VIII.

The Clerk shall be sworn to the faithful discharge of the duties of his office. He shall keep accurate record of the proceedings of the Association and of the Trustees at their respective meetings, and shall perform all the duties incident to his office as Clerk;

Duties of Clerk.

whether prescribed by law, by these By-laws or by vote of the Trustees. In his absence a Clerk *pro tempore* may be chosen, who shall also be sworn, and shall, in the absence of the Clerk, perform the duties of Clerk in his stead. The records shall be the property of the Association.

ARTICLE IX.

Duties of Treasurer.

The Treasurer shall, whenever required thereto by the Corporation or by the Trustees, give bond for the faithful discharge of his duties in such sum and with such sureties as shall satisfy the Trustees. He shall have the custody of the corporate seal, whenever one is adopted, and shall keep suitable books of account, which shall be subject at all times to the inspection and control of the Trustees. He shall take or give proper vouchers for all disbursements, and shall exhibit the financial condition of the Association to the Trustees whenever required, and to the members at their annual meeting. The same person may be eligible to the offices at the same time of Treasurer and of Clerk. The Treasurer may, with the approval of the Board of Trustees, delegate to the Librarian the keeping of accounts and other clerical duties of his office. All moneys received shall be deposited in bank in the name of the Association, and disbursements thereof shall be only upon checks signed by the Treasurer and countersigned by the Chairman.

ARTICLE X.

Duties of Librarian.

The Librarian, under the direction of the Treasurer and Board of Trustees, shall keep the accounts of the Association, and shall perform such other duties as may be assigned him by the Board of Trustees, including such as ordinarily pertain to the office of Treasurer, if thereto requested by the Treasurer and the Board of Trustees.

ARTICLE XI.

Rules and Regulations relative to the use of the library and rooms of this Association shall be made by the Board of Trustees, but no one shall be permitted to remove any book, map, survey, or other similar property from the Association rooms without a special vote of the Trustees authorizing him for special cause so to do. Such rules and regulations shall be duly printed for the information of members, and shall be displayed in the Association rooms.

Rules and Regulations.

ARTICLE XII.

These By-laws may be amended at any regular meeting of this Association upon a vote of two thirds of the members present and voting; and at any special meeting, provided that due notice shall have been given in the call therefor that an amendment of the By-laws is proposed. A copy of the proposed amendment shall be posted for two weeks upon the bulletin of this Association in its rooms, and shall be mailed to each member at least two weeks before the date of the meeting at which action is to be taken.

Amendments to By-laws.

Rules and Regulations

Smoking is not allowed in the Association rooms.

Copies or tracings of maps or surveys must not be made.

No one shall be permitted to remove any book, map, survey or other similar property from the Association rooms without a special vote of the Trustees authorizing him for special cause so to do.

Employees of Subscribers visiting the rooms must be known to the Librarian, and must not remain after the business on which they are sent has been transacted.

Subscribers' and Employees' Cards may be recalled at any time upon vote of the Trustees, and *pro rata* return of the amount paid for such cards.

Chairmen of Rating Committees of the New England Insurance Exchange may remove the maps of towns of which such Committees have charge, for use in any room of the Exchange, upon giving a receipt agreeing to return such maps during same day.

Old Policies and Policies used in Foreign Countries

Among other *memorabilia* the Association has received from various sources policies of interest because of their age; and also specimens of policies used in foreign countries, these latter being sent us by companies issuing them in response to a request therefor made while this Catalogue was in process of printing. These foreign specimens cover policies used in the following named countries: Austria, Balkan States, Belgium, Canada, Denmark, England, France, Germany, Holland, Hungary, Italy, Japan, Norway, Portugal, Romania, Russia, Sandwich Islands, South Africa, Spain, Sweden and Switzerland. They are arranged in the order named in a book large enough to permit the policies to be bound in full size, so that they can be readily inspected and compared by those interested in such matters. In this book have also been placed various old policies as follows: —

Office of Joseph Dows, King Street, Boston, with four underwriters, insuring sloop "Ranger," 1746.

Office of Nathaniel Barber, Ann Street, Boston, with three underwriters, insuring schooner "Three Friends," 1774.

Royal Exchange Assurance, London, insuring dwelling of David Garrick, 1775.

Hand in Hand Office, London (framed), 1778.

Office of John Hurd, Boston, with three underwriters, acting for twenty in all, and insuring brigantine "Chance," 1784.

Office of Peter C. Brooks, Boston, with four underwriters, insuring schooner "Sukey," 1800.

Hartford Fire Insurance Company, insuring Jonathan Ramsey of Hartford, 1817.

Washington Insurance Company, New York, insuring Thomas Brooks, 1821.

Massachusetts Fire and Marine Insurance Company, insuring Francis Stanton, 1829.

Photographic Views and Groups

The Association has been presented from time to time with photographs, many made by members who are amateur photographers, of groups of adjusters, outing parties, great fires and other interesting occasions and events; and these have been mounted in albums which are at the disposal of members and visitors upon application to the Librarian. These photographs are as follows:—

Conflagration at Marblehead, Mass., 1888; four views.

Conflagration at Lynn, Mass., 1889; seven views.

PREFACE.

The whole number of books and pamphlets added to the Insurance Library in 1900 was 856, in 1901, 475 and in 1902, 450, making nearly 1,800 accessions since the publication of Mr. Hess' Catalogue in 1899. Besides these have been articles of very great theoretical and practical value, contributed to current numbers of insurance periodicals, which, without attempting to enumerate, we have endeavored, by classifying and indexing, to rescue from undeserved oblivion, and make accessible to students of insurance. Thus the actual accessions to the library in the last three years must number several hundred, at least, more than appears from its regular reports.

These facts are offered as one reason for publishing at this time a supplementary catalogue of the Fire and Marine Insurance literature in the Insurance Library of Boston.

But there is another reason. While on its theoretical side fire insurance is pretty firmly established, so that it is subject to but little change from year to year, on its practical side it is subject to changes constantly. Its literature, therefore, as it touches the practical side, soon becomes obsolete, or at least insufficient, and in need of much supplementing. The Catalogue of 1899 makes available to the student the contents of the library three years ago; this catalogue aims to supplement that by making available what has been added since.

While the burden of an undertaking of this kind is necessarily great, it is believed that no contribution which the Insurance Library can now make will be more useful to members of the Association, more pleasing to the friends who have helped to make the library what it is, or more helpful to the fire underwriting fraternity as a whole. It is to be remembered that no other organization is at present engaged on so extensive a scale in collecting fire insurance literature; that no other is in a position to do the work of cataloguing so thoroughly; and in a way, since the literature of any subject becomes available in proportion as it is indexed and classified, that no work stands in greater need of being done.

D. N. HANDY, *Librarian.*

BOSTON, MASS., Feb. 28, 1903.

EXPLANATION.

The following pages are strictly supplementary. Nothing entered in the Catalogue of 1899 has been intentionally entered here. It is especially desirable, therefore, that students of insurance literature understand from the outset that this list must always be used in connection with the Catalogue of 1899, which preceded it.

Organizations and institutes established since 1899, or whose reports the Insurance Library has begun to receive since 1899, are entered here, with the usual information regarding them. Reports of all organizations entered in the Catalogue of 1899 as "complete" have been received complete to date. Individual papers and addresses delivered before the latter, during 1900, 1901 and 1902, are given in the following pages, under subject and author headings. The finding reference, by which any article may be located, is usually under the subject rather than the author heading. The key to the subject heading is furnished by the arrangement of titles under each "author" heading. Thus if it is desired to find a certain article on the electrolysis of gas and water pipes, by William Brophy, the seeker being sure only of the fact that an article on this general subject has been written by Mr. Brophy, he will find, on turning to BROPHY, William, "Electrolysis of Gas and Water Pipes, The Prevention of," but without any definite location of it. The word "Electrolysis," however, will serve as the key; and turning to "Electrolysis," he will find the article in question and its definite location.

Annuals, Insurance Journals, Directories, and Statistical and Law Reports, issued periodically, listed as complete in the Catalogue of 1899, have been received complete to date. They are not entered here.*

A list of abbreviations used in these pages, with the explanation of each, and of the few special classifications employed, will be found on the next page.

*For volumes and files still needed to complete sets of the above publications, entered in the Catalogue of 1899 as "incomplete," see the Insurance Library WANT BULLETIN, a copy of which will be sent on request.
